and you come  
then you go  
but maybe there is something you don't know  
and you go  
then you come  
but maybe there is something left undone

but maybe it's the wrong number  
maybe it's another door  
i should forget about every thing  
go out and drink  
get drunk and sing  
born to be here  
born to be drunk  
like a psychedelic funk...

can you give me some now  
can you give me some

and you rise  
then you fall  
but maybe there's something out of control  
and you fall  
then you rise  
but maybe there is something wrong with your eyes

but maybe it's the wrong number...
