"Lullaby"

Visit "[Lullaby](#)" on MotoLyrics.com

Oh hush now child
The town's asleep
But only for a while
Oh let this sweet little lullaby rock you too sleep before
daybreak

The traffic lights they glow
the streets outside all have turned cold
only this sweet little lullaby keep you warm
and help you ride out the storm

I once was like you my
world was green my eyes were blue
I heard a sweet little lullaby
playing through now I'm singing it to you

The world can kick you round
can bruise you up might even beat you down
So here's a sweet little lullaby to keep the monsters
gone
make sure you pass it on

The road might be long it may turn it may bend
But you can rest your mind cause you're far from the
pain
Dream away (dream away)
till the morning come clear
When you wake up I'll still be here
I'll still be here

(A little lullaby for you to get you through the night,
yeah)
(A little lullaby for you to make you feel alright)
(A lullaby for you, yeayeah)
