the eve that could be mine, I swear to you we was ment
to be, so just open up your mine so that I can see.

Girl what did you do with those magic shadow eyes,
you flew down quick, you took my heart by surprise.

Why sit back and let another get yours, see this
planet's mine for the taking, mine for the bakeing, now
it's time for the wakeing... So sit back and rewind your
mind, cuz i'm on another level and it's time I shine.

Now watch me slide on this function, I ride on the
chaos, so stay off my grip unless you really wanna trip.

My constant redial on your sex has got me sick, now all
i hear is hangup click.

Nothing can stop me, cuz I'm the stocker that stoked
me and the droper who droped me.

See in this game that I render, it holds many a
pretender, i said nothing can stop me i'm the big boss
conternder. My name's still the same, i've allways been
the one, so just rock your head back, have some fun.

The impossible is not when it comes to me, in this silly
game I allways ride for free. I squash other fools cuz
i'm still on top, i watch there game flop, so don't step to
me or i'll stop your clock.

My only mission is peace, to eat the promised feast,
with you god and my yesterday ceaced.

Scripts and triggas is all I see, i've discovered a hidden
languange embeded in reality. I've deciphered the
code to your mode, i've broken down your will... why oh
why did you take that blue pill.

The only way out of hell with with you by my side, so
listen to me while i die a little, cry a little, then i'll pass
the mic back, keep in mind that i'm ready to attack.

So until the end of time your heart is what i seek, even
if i'm weak... i'd walk through the fire, just to quench
your desire.... so keep in mind that in the end.. i'm all
you'll find as a friend.
