I dont know who you are, but I still care
It hurts to see that you're not here
I wonder day and night where you are but now Im
thinking that you dont care
You probably have a life of your own somewhere out
there
And maybe someday I'll know who you are but for until
then

CHORUS:

Im gonna cry a river, ask a few questions little by little
find out the past and cry a river

It doesnt matter what you look like or how you act all
that matters is that you're here

REPEAT CHORUS

When you're searching the channels and you see me
there on stage and your hear these words, I want you
to know that they're for you just to show you how much I
care!

You may hate me but I dont care all that I want you to
know is I Love You

REPEAT CHORUS 3 TIMES
