Count

Yeah, I count in fives
I do it every time
And if another number confronts me
I will cut you in half

Irrespective of the subject I will make it apply
No matter what the object I will count in five
Tell me the location, I will stand outside

Oh yeah, if you give me too many
I will multiply
Force too many into my hand
And I will not comprehend

Irrespective of the subject I will make it apply
No matter what the object I will count in five
Tell me the location, I will stand outside
(Time to murder)

Oh yeah, another number confronts me
And I force it to divide
The first time, someone holding my hands
The second, me holding it out

Irrespective of the subject I will make it apply
No matter what the object I will count in five
Tell me the location, I will stand outside

Tally, tally

Oh yeah, if you try to deceive me
I feel it burn in my hand
Now watch your numbers run to me
As I count them in fives
