### "The Wonderdrug"

Visit "[The Wonderdrug](#)" on MotoLyrics.com

Starborn, supernova, burning up like the sun  
Here we are together and the nights so young  
With this potent rhythm, like poison in my veins  
Saturday night fever and Sunday I feel the pain.  
We're all dreaming nowâ€¦ lucid on my tongue  
Never would've learnt to fly without your love  
The patient dream, the wonderdrug of tomorrow  
Never gonna purge the lies unless we sing; la da da da

Lets all steal the night and watch tomorrow come  
Coz I was wound so tight it's good to see the sun  
Oh I never met you here, but we could just pretend  
I could say "hello" and you could be my friend.
