Meet me tonight by the mulberry lake  
I got two legs that they said they'd brake  
Such a silly thing to do  
Fall in love with you

Don't be scared  
I got plans of my own  
We may be born here but this isn't our home  
Such a simple thing to do  
Run away with you

They say they'll come for me tonight  
They say they'll come for me tonight  
They say they'll come for me and none of them will  
comfort me  
Unless we leave this town tonight

We're better together, you and I, we were meant  
forever  
Don't get hurt, but I'm serious  
You and I, we were made to measure

Don't know how but they're onto us  
My lips were sealed, who betrayed my trust  
Such a silly thing to do  
Fall in love with you

I see stars and there's a pain in my chest  
I fell harder you said baby knows best  
My God what were you thinking of  
We're cut from the same cloth

They say they'll come for me tonight  
They say they'll come for me tonight  
They say they'll come for me and none of them will  
comfort me  
Unless we plan our escape tonight

We're better together, you and I, we were meant  
forever  
Don't get hurt, but I'm serious

You and I, we were made to measure

We were made to measure

We were made to measure

If you like I'll tear the sky in two

The broken moonlight will squeeze from view

I'd say we're falling from the very prospect of me and  
you

I'm taking back this town tonight

I'm taking back this town tonight

I'm taking back this town nothing good comes without a  
fight

Nothing good comes without a fight

Nothing good comes without a fight

But we will make ourselves tonight

We're better together, you and I, we were meant  
forever

Don't get hurt, but I'm serious

You and I, we were made to measure

Together, you and I, we were made to measure

I'm serious, you and I we were made to measure

We were made to measure

We were made to measure

You and I we were made to measure
