(Jett-Laguna-Anders)

Just a little girl in love, starin' at a penthouse suite
Waitin' for the star above to come an' join her
On the street

Maybe he'll want some company and she's got a dirty
plan
But he can disappear so suddenly, better grab 'em
while you can (you
better)

Standin' in a lonely room, high above the crowd below
With no one there to share the gloom, when
Underneath begins to show

Livin' in a world of fantasy, can't let the image fall
But he ain't the man he planned to be an' he would
Give it all

For just a little girl in love, someone who could share
his day
An' just what he was dreamin' of
Was just a hundred feet away

Just a little girl in love, just a little girl in love
There was just a little girl in love, there was just a little
girl in
love
