Feel sick I don't know what to say
Frustration building everyday
I've got to figure something for myself
I look at you and I see your frown
Another day when you're feeling down
Is it me or is this something else?

I wanna take your hand
And make you understand
That I thank god
He put me on this earth with you
What am I supposed to say
'Cause I think about it every day
But I gotta know just what you wanna do

Don't wanna scream, I don't wanna shout
Want to sit and figure this all out
Let's turn the TV off and spend some time
Spend a dollar yeah we spend one more
What exactly are we aiming for?
'Cause I know this isn't what we had in mind

I wanna take your hand
And make you understand
That I thank god
He put me on this earth with you
What am I supposed to say
'Cause I think about it every day
But I gotta know just what you wanna do

If I could give you what you want
Would it make your life complete?
I know you don't believe it's true
But yes I want it too
So please tell me 'cause I'm here waiting

What do you wanna do?
What do you wanna say?
