Give a sign
just give me something
something to ease my mind
captivate lives captivate people
captivate something 'cause something is good
kill me tonight burry me here
the taste of my blood will have softened your tears
wasting away, wasting these days
i feel disconnected from what i have made

This situation i wish i could walk away

kill me tonight
burry me here
the taste of my blood will have softened your tears
wasting away, wasting these days
i feel disconnected from what i have made

This situation i wish i could walk away

give me a reason is anybody listening
give me a reason is anybody listening
give me a reason is anybody listening

This situation i wish i could walk away
This situation i wish i could walk away
This situation i wish i could walk away
This situation i wish i could walk away
