I don't expect of you to remember
Whatever you thought, wished, hoped, said or knew
Or come on like I need some kind of surrender
Baby I just want to spend some time with you

It could be the color of the light let loose by thinking
Or the cool, clean kiss and caress of the clear morning
dew
Or maybe the moon as I rode in under it sinking
Baby I just want to spend some time with you
I just want to spend some time with you

You leave your saintly troubles all behind
Yeah for now for them you will have no use
It's not like you need to
Bend, blow, lose or blind your mind
Or to do with truth like
Truth would do with you

The seÑ±oritas in their cool mouths cradle flowers
Where they dance outside the factory gates at noon
Before the sun sinks way down low behind your
lonesome tower
Baby I just want to spend some time with you

Down on the boulevard we walk in jeweled equations
In the heat the piper fumbles for a tune
The street signs gleam and point to a million
destinations
Baby, but I just want to spend some time with you
