California dream
you are my symphony

All the angels sing their melody when you are with me.
California dream
in those days and nights we spent

In the golden sun
two lovers come together again.

Just don't know how I can get through alone without
you.
Miss your smile and the look in your eyes

So i'm waiting for the moment when my dream will
come true.

California dream
you are my symphony

All the angels sing their melody when you are with me.

Just don't know how I can get through alone without
you. . . .

California dream
you are my symphony

All the angels sing their melody when you are with me

When you are with me.
