Feel the morning sun,
The cool breeze flowing through you,
Has just begun,
You warm my winter heart,
I fall for you, but I just fall apart.

Ooh, it?s everything we are, (everything we are)
Ooh, it?s everything we are.

Drifting through the day,
I?m losing touch with you, can?t you see,
Looking through your skies, I believe,
There?s warmth in your eyes.

Ooh, it?s everything we are, (everything we are)
Ooh it?s everything we are. (everything we are)

Waiting for the morning light,
Waiting for the sun to shine,
Waiting for the morning light,
Waiting for the sun to shine.

Ooh, it?s everything we are, (everything we are)
Ooh it?s everything we are. (everything we are)

Ooh, it?s everything we are, (everything we are)
Ooh it?s everything we are. (everything we are)
