If they come in the morning how you gonna go.
The same old question but I still need to know.
I can't do it by myself.
If they come by night time what you gonna say.
Stick to your guns or just fade away.
What did we expect this all to be.
Resistance is not just one two three.
But we'll make it just you wait and see.
Right now it's coming to a end.
Right now we have no time to spend.
But I need you to reach out and to take my hand.
If you need it I'll give you all we've got to give.
You gotta arm yourself to live.
If they come in the morning what's gonna take
place.
Bend over backwards or kick 'em in the face.
I can't do it by myself.
If they come by night time with their boots and all.
You gonna fight them back or just take the fall.
I don't want to end up with regrets.
We are not as old as them yet.
We'll still take what we wanna get.
Right now it's coming to a end.
Right now we have no time to spend.
But I need you to reach out and to take my hand.
If you need it I'll give you all we've got to give.
You gotta arm yourself to live.
If they come in the morning how you gonna go.
The same old question but I still need to know.
I can't do it by myself.
Right now it's coming to a end.
Right now we have no time to spend.
If you need it I'll give you all we've got to give.
You gotta arm yourself to live.
Right now it's coming to a end.
Right now we have no time to spend.
If you need it I'll give you all we've got to give.
You gotta arm yourself to live.
You gotta arm yourself to live.
You gotta arm yourself to live.
