Back when it was our world once upon a time
Back when she was my girl brown hair and brown eyes
She was so far from normal with fire in her eyes
She swears that we all came from aliens
That's what love is all about that's what love is all about

Chorus:

The world may change the world may go
The world may leave for all I know
Every breath of this sweet air fills me up and takes me
there

I took her on a road trip from Omaha to L.A.
Cruising through Hollywood we swore that we'd stay
We found ourselves a little corner
Tucked away from the troubles of life
We worked all day just to make ends meet
Then we'd go to the beach at night
That's what love is all about that's what love is all about

Chorus:

The world may change the world may go
The world may leave for all I know
Every breath of this sweet air fills me up and takes me
there

Bridge:

Summertime love that would never end
Holding onto her like the summer wind
What I remember will never part
Dancing in the rainfall touching in the dark

Chorus:

The world may change the world may go
The world may leave for all I know
Every breath of this sweet air fills me up and takes me
there

Back when it was our world once upon a time
Back when she was my girl brown hair and brown eyes
Brown hair and brown eyes
