They set alight to the toad that came out of the drain, it
burned for a while until it stopped to die
I remember then I was searching through the leaves
and the limbs but I can't say
Execute yourself
A criminal brain
A cat in the rain
Haggle with the real cheap one
Cut the corners so the jape will not know
Hack it when the dust clears
Your depressed cause it's your friend you died
When seen from above and looking down a rubber
hose I got a lesson then
How right I am how wrong I was
How...how...how...how...how...how...how...how...
Climbing back on the road so I am told is a gamble on
its own
They set alight to the toad that came out of the drain
It burned
Could it be that I'm an idiot
