You're number 1, I'm number 2
I've never been ahead of you
You are the one they want to be
But everybody's getting sick of me
You bought a guitar, learned how to play
I never figured out the way
To play a chord or a melody
I guess this is how it's supposed to be

I figured this should be my time
I've never done some kind of crime
Still you're the one who gets the cred
And end up with sexy girls in bed
I'd like a life that's glamorous
But not like you and that's because
Those girls might there for tonight
But in the end you'll be so miserable

With a big piece of bravery
And a small piece of insanity
I've made up my mind to be
Nothing like you
With a big piece of bravery
And a small piece of insanity
I've made up my mind to be
Nothing like you

You can make sure I'll be around
But not like before cause I have found
That I'm not weak no I am strong
And I'll write a different kind of song
A twist that will change the way we are
I'll buy a big and expensive car
To cruise around and just have fun
You will be no one and I'll be the sun

With a big piece of bravery
And a small piece of insanity
I've made up my mind to be
Nothing like you
With a big piece of bravery

And a small piece of insanity
I've made up my mind to be
Nothing like you

One day a bird-camel came and laid a cable
One day a bird-camel came and laid a cable, okay
[There's no such things as bird-camels, but this one
laid a cable]

With a big piece of bravery
And a small piece of insanity
I've made up my mind to be
Nothing like you
With a big piece of bravery
And a small piece of insanity
I've made up my mind to be
Nothing like you

I'm number 1 you're number 2
Everybody's getting sick of you!
