So down there's nothing left  
Just memories and passive cry  
No I won't stand in line  
And be another well dressed ghost

With you or without you  
Times goes on  
Until everything you love is gone  
Our lives are in the hands of a ticking clock

Tonight's the night  
That we make our getaway  
They told us  
This would be our biggest mistake

Tonight's the night  
That we make our getaway  
We leave it all behind  
We leave it all behind  
And never go back  
And never go back

He's so down  
He lost his job  
We've forgotten who we are  
So say goodbye  
Because today  
Is the first day of our lives

With you or without you  
Times goes on  
Until everything you love is gone  
Our lives are in the hands of a ticking clock

Tonight's the night  
That we make our getaway  
They told us  
This would be our biggest mistake

Tonight's the night  
That we make our getaway

We leave it all behind  
We leave it all behind  
And never go back

So take me by the hand  
And run as fast as you can  
We'll find the place to call our own  
And start all over again  
So take me by the hand  
And run as fast as you can  
We'll find the place to call our own  
And start over again  
And start over again  
And start over again

Tonight's the night  
That we make our getaway  
They told us  
This would be our biggest mistake

Tonight's the night  
That we make our getaway  
We leave it all behind  
We leave it all behind  
And never go back

Tonight's the night  
That we make our getaway  
They told us  
This would be our biggest mistake

Tonight's the night  
That we make our getaway  
We leave it all behind  
We leave it all behind  
And never go back
