(..might seem closer, might seem closer, might seem closer..)

A new kinda temptation, a stimulation
I'll be lovin on the run
Take notes if you must, dear
But don't interfere, cause there's a newer kind of fun
And if you can't stand the heat
Get out the kitchen, cause I've only just begun
I'm movin faster than a jet plane
And now I'm itchin, like a trigger on a gun

Hey engineer, take me on a trip (take me on a trip)
I hear it blow when my records never skip

Moving, objects, might seem closer (might seem closer)
But everybody's doin it, doin it, doin it
More than just intuitive, did you hear
Sex is like a chemical, chemical, chemical
Movin like a freight train, please stay clear
Don't want it, second guess it
Is it what you want or what you feel?
What you gonna do with it?
Take what you can get while I'm here

One short for admission
Uncheck your ticket, lose your baggage you don't need it now
It's a healthy addiction.
Did you feel it? Or do you need someone to show you how?
Little mama on a mission
With no restriction, cause the hit is what it's all about
And just like I predicted, you're so inflicted
Yea I'm the rush that you can't live without

Hey engineer, take me on a trip (take me on a trip)
I hear it blow when my records never skip

Moving, objects, might seem closer (might seem

closer)
Everybody's doin it, doin it, doin it
More than just intuitive, did you hear
Sex is like a chemical, chemical, chemical
Movin like a freight train, please stay clear
Don't want it, second guess it
Is it what you want or what you feel?
What you gonna do with it?
Take what you can get while I'm here

Passing through my veins, I can't set off his track
I'm feeling more insane, the rails will lead me back
We're heading for a place to lead you nowhere near
The obvious affairs (?)
We're leaving on a freight train
Please stay clear

Everybody's doin it, doin it, doin it
More than just intuitive, did you hear
Sex is like a chemical, chemical, chemical
Movin like a freight train, please stay clear
Now don't want it, second guess it
Is it what you want or what you feel?
What you gonna do with it?
Take what you can get while I'm here

Moving, objects, might seem closer (might seem
closer)

*(thx jessica for the corrections)
