Those girls look so pretty sitting in their lawn chairs  
With their acid-washed jeans and their teased-up hair  
I like the one in the heavy metal T-shirt  
She got me so nervous my stomach is starting to hurt  
I tried to kiss her in the fourth dimension  
But the teacher gave me five days detention  
I tried to kiss her in the fourth dimension  
But the teacher gave me five days detention

Don't listen to your left brain  
Don't listen to the right  
Just listen to your body  
When we're out on Friday night

She looked like a gift on Christmas day  
With her blue eye shadow and a bottle of hairspray  
I tried to get into her pants  
But the teacher destroyed my teenage romance  
I tried to get into her pants  
But the teacher destroyed my teenage romance

Don't listen to your left brain  
Don't listen to the right  
Just listen to your body  
When we're out on Friday night

Don't listen to your left brain  
Don't listen to the right  
Just listen to your body  
When we're out on Friday night

The left brain is so much fun
