Fields and forests call your name (
But I just lay in wait
(Traps and schemes come in your dreams (
And I am just the bait
(On the edge of town
I will pull you down
(To the underworld (
To the underworld
To the underworld
You're a rabbit in my hands
And your heart beats so fast (
I do what my god commands
What's wrong is right at last
You can take the stairs (
And come into my lair
(to the underworld (
To the underworld
To the underworld

I am nature's daughter
And I'm livin' beyond the sun (
You're more than what you barter
With the souls of everyone (
I do all the things you fear
I can't just watch and wait (
Cause I love all the things you love
And hate the things you hate
(On the edge of town, I will pull you down
(to the underworld (
To the underworld
To the underworld

Finally you're learning what they don't want you to know
(Finally you're going where they don't want you to go
(On the edge of town (
Yeah, I will pull you down
(To the underworld (
To the underworld
To the underworld
