United we stand in shared perversion
The love of death, the paradise of Hell
This infinite limbo, like a great black engine
Ultimate abomination, no one here gets out alive

Let the poison arrows fall
Let the pillars of heaven crumble
Martyrs to no one but ourselves
We are the rusted pillars of a better tomorrow

Give me your crippled hand and I'll drag you into
evolution
Compassion is obsolete, the answers are no longer
true
To many sides to chose from, fascism in masked
control forms
Paradise prepare for deconstruction

Welcome to the radiant silos of Atom
Man made misery, the perfect anti life
Divine radiation, the corruption of flesh
Ours is the God of nuclear winter

Synthesized evolution of tomorrow
When we tried to become, the world turned negative
You were the words in my mouth
When I was just trying to save their world

Welcome to the radiant silos of Atom
Man made misery, the perfect anti life
Divine radiation, the corruption of flesh
Ours is the God of nuclear winter

Once I was the carrier of wounds
Featherless and without direction, never a saint nor a
Saviour
Relentless in my search for a higher existence
In a nuclear war all men will be cremated equal
