You wear a cheap disguise
Your only vice until the end
Don't have an alibi
You never try
You just condemn

You pressure everything
You never bring
You take away
I can no longer breathe
You've taken me and everything too

(Far) To me it's so disgusting
(Wrong) I push myself away
(Far) My sanity is rusting
(Wrong) I look the other way

This is a war I can't fight
I can't let you tear me down
I will ignore all these lies
You will never tear me down

I sit and contemplate
How you sedate what's in my head
I will not instigate or emulate
I won't pretend

You'll never understand
You just demand to get your way
How all of this began
I never ran, and now it's gone too

(Far) To me it's so disgusting
(Wrong) I push myself away
(Far?) My sanity is rusting
(Wrong) I look the other way

This is a war I can't fight
I can't let you tear me down
I will ignore all these lies
You will never tear me down

This is a war I can't fight
I can't let you tear me down
I will ignore all these lies
You will never tear me down

Never tear me down
Never tear me

This is a war I can't fight
I can't let you tear me down
I will ignore all these lies
You will never tear me down

This is a war I can't fight
I can't let you tear me down
I will ignore all these lies
You will never tear me down

This is a war I can't fight
I can't let you tear me down
I will ignore all these lies
You will never tear me down

Never tear me
Never tear me down
Never tear me
Never tear me down
