Don't be afraid look at me  
Sing with your eyes  
What you see with your heart

Now don't be shy speak to me  
Deep in your soul the three words  
I love you

Other nights come back to you  
Other times they follow you  
See the moon it's been out  
Many times  
Many times

Does the sun forget the world  
See the sun begin the day  
Some are born  
Some are loved  
Some are lost and alone

Don't be afraid hold on to me  
Sing with your eyes  
What you feel with your heart

Think with your dreams  
Don't try to hard  
All questions will float  
Away and fly

Please be with me in every dream  
Fly by my side I wait here forever  
Don't be afraid hold on to me  
Sing with your eyes  
What you feel in your heart
