Keeping us together, and pulling us apart, is the love  
that we talk about  
I'm finding it harder every day to take it as it comes  
But as one fool once explained to me, you can't choose  
who you love

Chorus:

Everybody's cheating on the one they love  
Everybody's looking for the summer sun  
Though I believe I love you till my life is done  
I live your lies and alibis, the telltale stories in your  
eyes  
'Cos you are, you are the one I love

Yes I love you like you love me, I need you like a lover  
Though you need me and I need you, we're still  
cheating on each other

chorus

What is the question, what is the answer, what is the  
reason why  
People like you, and people like me, we live our lives  
with lies

chorus
