I was feeling much in need of the arms of a lover

When my radar picked her up on the arm of another

I've been looking for the one, and I tell ya brother

I had the feeling we were gonna be more than friends,
we were, but it's over

Chorus:

Still looking for the one with the fire in her eyes, living
inside of paradise

Still looking for the one, I like the light

Darling don't let me sleep alone tonight (still looking for
the one)

And wake in the morning, all alone and

Looking for the one, looking for the one

Too many nights with the wrong one, and my heart ran
for cover

I'm a lonely lonely soul in search of another

I've been a wanderer baby, since I left my mother

I've got a feeling you're gonna be here in time, and I
know you will

chorus repeats 2x

Looking for the one!
