1 - I wanna love you, every night, every day

You know I need you in my life

Won't you stay?

I wanna love you, every night, every day

You know I need you in my life

Won't you stay?

You are the reason why I live, hmm

A newfound joy I can contain, yeah

Find myself thinking 'bout your love, hmm

It's a feeling I get only my heart can explain

You know I

Repeat 1

I've never felt so deep in love

I think it's because

You've touched a special part of me, baby

Hope I'm the one you're thinking of

You must be feelin' the same as I do

I can't see being in love without you

Lady, lady

Girl I think about you everyday

Hopin' you will never go away

It's so special when we all can share  
Someone who'll give us tender loving care  
Girl I think about you every night  
Sharing dinner and a candlelight  
I'm sayin' I love you  
And I'm hopin' we'll be together for eternity  
Repeat 1  
I'm lovin' you, lovin' you baby  
Gonna say it one more time  
Said I'm lovin' you, lovin' you baby  
I'm lovin' you babe  
Said I'm lovin' you, lovin' you baby  
I'm lovin you baby  
Repeat 1 until fade
