1 You just keep on pushing

You won't let it get away

You've got my mind thinking

We won't see another day

If you keep on reaching and stressing me

You might just push me away hey

Girl you've always got some drama going on

Somebody told me that they saw you in an ex man's
arms

Drinking and laughing passions spashing Alizae

And you caught an attitude when I asked you what you
had to say

Don't get it twisted cause I caught it on the low

But you got me open like I've never been before

You come home late at night, I'm chilling with my
friends

Then comes an argument

You got me thinking about leaving you again

Repeat 1

Nothing is easy when it comes to loving you

I know your not feeling me the way that you used to

And now that I floss and toss, ice all over my wrist

You wanna run back to me

But it's so hard to forget

I took you shopping, tricking your g's up at the mall

Whenever I page you lady you don't return my calls

I don't wanna play a hate but girl it's not a game

I can't take you serious so I gotta get away

Repeat 1

Girl you've been macking seriously from the door

And I should let you know

This right here ain't yours no more

So stop blowing up my pager

Coming, acting like a stranger

Calling me, pushing me away, yeah

Repeat 1
