Cover your eyes and cover your ears  
Don't taste life for 21 years  
In your yuppie dream world you sit at home  
Watching tv there all alone  
No one really dies like on tv  
We'll all live 'till eternity  
I'd say it's time to wake up and see  
What's really going on, on your planet's dream  
Wake up!  
They're gonna make you no one  
They want you no one  
They're gonna make you no one  
They want you no one  
They're gonna make you...  
They're gonna take you  
No one (no identity)  
No one does drugs they aint real  
And from your house we never will steal  
And all hungry people eat big meals  
And companies always make fair deals  
If you weren't so blind you'd understand  
Life is real: look at your hands  
Raise for raise: higher wage in time  
If you screw your boss sex is divine  
See no evil  
Hear no evil  
Speak no evil  
No evil : no evil : no evil!
