Visit "[Collapsible Construction](#)" on MotoLyrics.com

Your plastic is corroding as you polish your smile  
I guess you get and you give it and you stay for a while  
Stay for a while

Temporary size of emotional bliss  
Made for replacement, face the acceptable risk  
Safe for a while

Oh, but if you get me, you'll try to see  
The way I think my philosophy  
Is an addiction to the details in life  
It's not too hard to find the open mind  
It's a product of an ancient design  
The contraption of collapsible construction

Your forehead is exploding while you're waiting in line  
Classic reconstruction of a tragic design  
Tragic design  
Patronising patronage while falling asleep  
Suck it in, tell me when the differences meet  
Tragic design

Oh, but if you get me, you'll try to see  
The way I think my philosophy  
Is an addiction to the details of life  
It's not too hard to find the open mind  
It's a product of an ancient design  
The contraption of collapsible construction
