What's it going to take to stop all the global warming  
Where we turn our days into darkness  
And our earth into dust and ashes  
When we need to clean the air we breathe  
And clean all the hair out of the dirty old sink?  
What's it going to take to clean our rivers and streams,  
and all the water we drink?

Green, green, green is the answer!  
Green, green, green will kill all the cancer!  
Green, green is the only thing  
That can save the earth!

What's it going to take to stop children crying  
And to stop all the dying from all the production  
Of greenhouse gases and emissions?  
What's it going to take to stop polluting our planet  
And get us to recycle to save ourselves from  
destruction?

Green, green, green is the answer!  
Green, green, green will kill all the cancer!  
Green, green is the only thing  
That can save the earth!

What's it going to take to stop destroying our wetlands,  
forests, and our oceans ?  
What's it going to take to get us to recycle  
and save our planet from destruction?

Green, green, green is the answer!  
Green, green, green will kill all the cancer!  
Green, green is the only thing  
That can save the earth!

Only Green can save this earth!  
Only Green can save this earth!
