[Verse]

He's waiting down at the corner under the streetlight
He's only following orders 'til midnight
And then he'll sneak back home to his wife,
and his everyday life.

He says he's been at the pub with the boys all the night,
she acts as if she don't know, says, "it's alright."
But he knows she don't believe him.

On and on, on and on.

[Chorus]

Cause nothing lasts forever,
and nothing lasts forever.
Everything dies eventually,
cover your eyes if you don't want to see. x2
And nothing last forever, and nothing lasts forever.

[Verse]

This isn't how she thought that her life should be.
When they first met back in '63,
and a future together was all she could see, all she
could see.

He said if you stick with me,
then you know we'll be alright.
A family for the rest of our lives,
and I'll always be by your side.
And that's when she cried.

On and on, on and on.

[Chorus]

Cause nothing lasts forever,
and nothing lasts forever.
Everything dies eventually,
cover your eyes if you don't want to see. x2
And nothing lasts forever, and nothing lasts forever.

[Bridge]

So he takes off his tie and he tells another lie,
she only believed it for a minute.
And she doesn't ask why,
she doesn't want to pry.

She only believed it for a minute.
He's walking out the door and into a new life,
he's already got plans with his new wife,
and a house in a new neighborhood.
He says he's been at the pub with the boys all the night,
she acts as if she don't know,
says its alright.
But he knows she don't believe him,
but she's sick of arguing.

On and on, on and on.

[Chorus]

And nothing lasts forever,
and nothing lasts forever.
Everything dies eventually
cover your eyes if you don't want to see. x2
And nothing lasts forever, and nothing lasts forever.

[Outro]

She's been waking around,
with her heart dragging on the ground.
She don't need to frown. x2
