I'm choosing you
You are choosing me
Let's get together
And write a screenplay
Who do you want to be?
I'll be the one who gets her way

I'm using you
And you're using me
I'm using you
And you're using me

You thought I loved you
You think I still do
I'm taking a ride
You're my trophy
You're my prize
I'm too scared to go alone
You're too vain to know
When we walk in a room
They stare at you
And I'm cool by association
And I'm gonna get some

I'm using you
And you're using me
I'm using you
And you're using me

I'm using you
And you're using me
For something

I'm using you
And you're using me
