[Instrumental]

We've shared some great times in the past,
but I always knew that it couldn't last.
You've always been my best friend,
but I guess all good things must end.

[Chorus]

As much as I don't want to it's time to move on.
And I'll miss you more than you'll ever know.
It's time to leave my past, (and I go home)
to another wasted tomorrow

Tonight I'll go to sleep just to escape,
and try to kill this feeling that I just can't shake.
When morning comes back the feeling will too.
I've done all I can now what else am I supposed to do?

[Chorus]
