Help is on the way tonight
Violins are out of sight
Swinging through the chords within
Shivering, our ears to ring

If we'd fall, I'd take it all
So you know I won't let go
But I'll be here wasting all my time

Misery won't set you free

Out of the dark I will find what I wanted
Every time till I get what I want
Face the truth, its black and white
I don't want to fight

Emanated your discard
For empathy in what you see
I can feel the lowering
Of energy from you to me

If you fall you'll take it all
So you know I will let go
The mirror the one I used to know

Misery won't set you free

Out of the dark I will find what I wanted
Every time till I get what I want
Face the truth, its black and white
I don't want to fight

These damsel eyes
These ties o mine...incoming
