Walk right out on me
As I'm going out
Into the waters that I found
And we will feed the blindness

We will run, we will fall
Never thought that I was out of touch
If we could feel all of the pain
I wouldn't mind

Every time you turn around
I'm a face in the crowd
Every time you turn around

A call came from inside
And through the walls
Where we can see the lonely crows
And we will feed them blindly

Shattered sun, we will run
I promise you that I was out of touch
With what we can feel everyday
It's in your mind, yeah...

Every time you turn around
I'm a face in the crowd
Every time you turn around

Jealousy overwhelming me
Take this risk
Count from one to three
Out on the dance floor
