Surrounded by surrenders

So detail this policy  
We got tendency  
To chase something fake  
Can't stop this legacy  
Repeating every mistake into another mistake  
Piece by piece, choose by choose  
Keep your ass down to truth  
Nothing gone escaped this, and you too!

No time for looking forward  
No time for looking back  
We get now  
We get all  
Of this fuckin' land

That's called "evolution"  
Please read "self-destruction!"  
We get now  
We get all  
We got sickness  
We got fault!  
-Gravity is killing me! -

Bury the past, don't give a shit  
We got concrete  
For the future's sake  
Can't stop this legacy  
Repeating every mistake into another remake  
Piece by piece, step by step  
Lots of secrets, laid to rest  
Nothing gone escaped this... no!... tomorrow nothing  
will never escape!

This is stronger anymore, as an animal... !  
This is stronger anymore, as an animal  
This is stronger anymore, I'm an animal

Criminal 'n' paranoid  
Parasite

Only searching paradise  
To multiply  
Thru the motherfuckin' time  
Metropolitan pain  
Toxic rain  
Nothing can be sane  
The sufferance  
People die  
Oh my god!  
It's our shit that falls from the sky...  
Go!

Never enough!

It's the only law  
We still are slaves  
It's the only force  
That keeps us here  
So close your eyes now, and believe  
We get now  
We get all  
We got sickness  
We got fault!

Gravity is killing me!
