Oh, meet me downtown
For another around
We'll talk until the sun goes down
There ain't no one here but us

Oh where's the time gone?
Let's play our song
We'll dance until the crack of dawn
There ain't no one here but us

If rules are meant to be broken
Why am I choking on words
I couldn't say
I let you slip away

Chorus:
The closer we get
The harder I fall
The moment we met
You had it all
No matter what happens with you & me
You're still my baby
Hard to forget
You know who to call
Full of regret over somethin so small
No matter what happens with you & me
You're still my baby

The one and only, girl
You know its true
You're still my baby

Your perfume
Fills the room
You still wear the kind I bought for you
There ain't no one quite like us
No, no, no

Your new guy
He sounds nice
And yea I did it, once or twice

There ain't no one quite like us

If rules are meant to be broken
Why am I choking on these words
I couldn't say
I let you slip away

Chorus:

The closer we get
The harder I fall
The moment we met
You had it all
No matter what happens with you & me
You're still my baby
Hard to forget
You know who to call
Full of regret over somethin so small
No matter what happens with you & me
You're still my baby

The one and only, girl
You know its true
You're still my baby

You're still my baby
You're still my baby
You're still my bay ay ay bay

Chorus:

The closer we get
The harder I fall
The moment we met
You had it all
No matter what happens with you & me
You're still my bay bay
Hard to forget
You know who to call
Full of regret over somethin so small
No matter what happens with you & me
You're still my bay bay

The one and only, girl
You know its true
You're still my baby

Oh, meet me downtown
For another around
We'll talk until the sun goes down
There ain't no one here but us
