

International Noise Conspiracy, The "Ready Steady Go!"

Visit "[Ready Steady Go!](#)" on MotoLyrics.com

Got my heart set on destruction, going to plant a bomb
inside my mind
Filled with passion, hope and resistance, take it to the
streets this time
Going to steal the language of power, the power of
these words are ours
No rhetorical blackmail to will us convey, baby there's
no other way
Got my heart set on destruction of the more Bakunin-
esque kind
Tear it down to built something new up, work myself all
wet this time
Going to gather my brothers and sisters, together we
will organize
The biggest festival of the history, the biggest party of
our lives

Yeah, I'm going to bring you some news
I've got the insurrection blues

Got my heart set on destruction, going to plant a bomb
inside my mind
Filled with passion, hope and resistance, take it to the
streets this time
Going to gather my brothers and sisters, together we
will organize
The biggest festival of the history, the biggest party of
our lives

Yeah, I'm going to bring you some news
I've got the insurrection blues

You and me, the conspiracy
