I wanna explode like the times when we were getting
down
down under the pavement what do you think that we
might find
oh baby what's the secret behind your smile,
can you please show me now
I wanna make you feel the way I feel when I'm with you
as simple as it seems all these dreams they're nothing
new
oh I want you to feel it too,
oh I want you to feel it too, the way I feel about you
let us get corrupted by sin and the passionate new
sound
the sound of young lovers, revolutionary babies on my
mind
oh darling pick up a cobblestone and run and leave the
old behind
I wanna make you feel the way I feel when I'm with you
as simple as it seems all these dreams they're nothing
new
oh I want you to feel it too,
oh I want you to feel it want to touch your heart,
I want to steal your soul, just like you stole mine from
me
I wanna make you feel the way I feel when I'm with you
as simple as it seems all these dreams they're nothing
new
oh I want you to feel it too,
oh I want you to feel it too, the way I feel about you...
