[K-Rino]

Extreme genius, means supreme linguist
Steam from the unseen beam, left teams spleinless
Thought schemes redeem, souls and bring cleanness
A king sleeps sixteen blings, could not dream this
Take aim shameless, rain and stood blameless
The untamed rebels I flame, remain nameless
Make it rain jugular veins, it's never painless
Craniums I drain, till frames became brain-less
I'm seeing far places, and evil that's unformed yet
The reincarnation, of people who ain't born yet
Bomb threat, tropical storm making your palms sweat
Human unicorn, who ain't developed his horn yet
If you blind, follow my design and find me
Ahead of my time, like I got a clock behind me
This is a class to me, you want me just ask for me
I travel so far ahead, your future's the past to me

(*talking*)

We are all time travelers, each one of us holds the
capacity
To transport ourselves, to any period of existence
Past present or future, the abstract method of travel is
the human mind
The concrete method is our own divine blood line, time
travel witness it

[K-Rino]

I was there, in the midst of triple darkness
In the mind of the originator, right after he brought this
Universe into existence, I witnessed
The profits predict instances, that would happen in the
distance
I was there, when they made trips
To Africa, and transported us in the holes of the slave
ships
I stood next to Harriet, with a rifle
And over saw Jesus, speaking to his deciples
I seen the whole, slave period
And I was one of the builders, of the Sphinx and the
pyramids

I saw, the Titanic ship sinking
And I was one of the last slaves, but had no love for
Abe Lincoln
I watched streets, turn deadly
I kicked back and saw God, drown Pharaoh in the Red
Sea
I ran, down court with Jordan
I even tried to warn Eve, about the serpent in the
garden
I built satellites, that scan stars
I listened in on American presidents, at they playing
wars
I traveled, through millenniums
I saw the Pilgrims spread disease, murdering the
Indians
I saw em, bringing in cocaine
Was in the lab when they made crack, and sparked up
the dope game
And the first rock, lit up
I was sitting on the bus, the day Rosa wouldn't get up
Saw King's dream, in plain view
And I was there years from now, when the dream
finally came through
Me and Garvey, was stepping
Nat Turner was my boy, I'm the one that gave him his
murder weapon
I saw Allah, murder Babylon
I was at Savior's Day, when Elijah chose Farakhan
I saw the Japanese, Show Gun
And I was one of the Egyptian scholars, that Socrates
stole from

[Hook: Mista Mann]

Time traveler, when me move with time-time
Time traveler, it's in me blood line-line
Time traveler, it could boggle your mind-mind
Time traveler, the universe is mine-mine

Time Traveler - 16x

[Hook]
