Did I say that I want you?
Did I say I need you?
Did I kiss you that night?
I don't remember who was next to me
Boy you'd better watch your mouth
You always lied to me
I'm not gonna trust you
Life won't go easy
You said you were hanging out with your boyfriends
But I saw you walking in the crowded street
I knew that girl was my best friend
Oh, you can't hide it from me

I wanna take you to paradise
Yes, you're so bright to me
But it's too late to apologize
Shut your mouth and get your face out of here
Right now
Baby you don't know where to hide
You'd better keep truth to yourself then I...
I'm gonna make you change your life?

Don't throw yourself like that
I'll give you just one chance
But I don't want to waste
Oh, I don't want to waste my time
Time taught me to never stop
Love taught me how to kiss
Kiss taught me how to lie
Boy, life is rounding and rounding

I wanna take you to paradise
Yes, you're so bright to me
But it's too late to apologize
Shut your mouth and get your face out of here
Right now
Baby you don't know where to hide
You'd better keep truth to yourself then I...
I'm gonna make you change your life?

Life is rounding, never stop and

I know you're gonna lie to me
I don't give a shit and
You have to shut your mouth or I will be you

I wanna take you to paradise
Yes, you're so bright to me
But it's too late to apologize
Shut your mouth and get your face out of here
Right now
Baby you don't know where to hide
You'd better keep truth to yourself then I...
I'm gonna make you change your life?

I wanna take you to paradise
Yes, you're so bright to me
But it's too late to apologize
Shut your mouth and get your face out of here
Right now
Baby you don't know where to hide
You'd better keep truth to yourself then I...
I'm gonna make you change your life?
