M.U.S.I.C.

The rhythm is our life  
Every day and every night

If the moon is up or the sun is shining bright  
We're surrounded by this miracle

It's not lyrical  
A universal language that's so beautiful

I know... rhythm is what we need  
I know... rhythm is unity  
I want... everyone to join and sing with me

M.U.S.I.C.

This is what we need  
In this world community to get unity

M.U.S.I.C.

This is what we need  
This world language is made to succeed

Doesn't matter where you're from  
Doesn't matter 'cause it's strong

No matter which state through music we communicate  
And if you're down or if you're sad

Are you fed up with everything  
Just listen to the rhythm and feel the swing

I know... music will succeed  
I know... music is all we need

Music... makes us feel alright and our life so bright
