Where is it now
That feeling you said it would blow my mind
Hours and weeks
Are we afraid of getting old

This is our chance to be in it all
Here it is creeping and crawling under your skin
Will you let it in no
The days are getting longer and longer again
When spring comes it eases the pain
There ain't no such thing as bad weather
Though I know it could be better
So put on your coat and your smile

Where is it now
The times when we did what we wanted to
Through hours and weeks
When will we learn to dig where we stand

This is the place that we call our home
Here it is waiting for us to be in it all
Will you let it in no
The days are getting longer and longer again
When spring comes it eases the pain
There ain't no such thing as bad weather
Though I know it could be better
So put on your coat and your smile

The days are getting longer and longer again
When spring comes it eases the pain
There ain't no such thing as bad weather
Though I know it could be better
So put on your coat and your smile
