Recognition coiled in mare streams
Used as material to drop from the sky
I welcome you to the land of choice
I seek shelter from these angry stars

Nailed to confession, I speak of friction
The blunt shuffled pattern in the center of his brain
As fear takes control and delirium is fulfilled
No longer provided with this lonely fury

Anxiety, ruling the spawn of corrosion
The force of gravity will soon abolish
I am a curl and a vomit pearl
And soon I will be taken

A permanent rape of the wistful element
A carnival elephant dancing on the clouds
Two times the killer that created the betrayer
He stood there and watched it all

But in his paradise, logic come to visit
A mythic creature with beauty in it's voice
And gave him instructions on how to prevail
And overcome the panic of his twisted reality
