Don't you think it's time you came out from behind
That mask you wear that hides your heartache
If you follow me, I promise you will see
The pain wil disappear before the daybreak

Feel it everywhere there's magic in the air
And the night's full of love from the fire we started
Listenin' to the sound of music all around
There's magic in the air... Magic, Magic
Magic in the air... Magic, Magic

Now, don't regret mistakes like every lover makes
While searching for his happy ever after
Everytime you cry, you hide out of sight
A place that one can feel with love and laughter

Feel it everywhere there's magic in the air
And the night's full of love from the fire we started
Listenin' to the sound of music all around
There's magic in the air... Magic, Magic
Magic in the air... Magic, Magic

[Interlude]

Feel it everywhere there's magic in the air
And the night's full of love from the fire we started
Listenin' to the sound of music all around
There's magic in the air... Magic, Magic
Magic in the air... Magic, Magic

Now, it was no surprise I feel into your arms
It's simple and sweet and sets me burnin'
When you spoke my name, my heart went aflame
I knew a special love was just beginning

Feel it everywhere there's magic in the air
And the night's full of love from the fire we started
Listenin' to the sound of music all around
There's magic in the air... Magic, Magic
Magic in the air... Magic, Magic
I feel it everywhere... Magic, Magic

'Cause there's magic in the air... Magic, Magic

[Guitar solo]

Feel it everywhere there's magic in the air
And the night's full of love from the fire we started
Listenin' to the sound of music all around
There's magic in the air... Magic, Magic
Feel it everywhere there's magic in the air
And the night's full of love from the fire we started
Listenin' to the sound of music all around
There's magic in the air... Magic, Magic
Magic in the air... Magic, Magic
I feel it everywhere... Magic, Magic
'Cause there's magic in the air... Magic, Magic

In the air... in the air... in the air
In the air... in the air... in the air (fade)
