Love is a precious gift from God; without love there would be no life.
So understand that the greatest achievement for any human is to loved by God, yourself and others.

And I know they say
That we in our last days so we all need to pray
And I know they say
That sometimes we stray but love will make us stay
And I know they say
Nothing to our face but behind our backs they hate
And I know they say
All kind of things but who cares anyway

This is the story of a young man trying to change his life
He gave up gang banging selling drugs and found Christ
But no matter what he does they bringing up his past
They say he's no good, and he's just like his dad
Because he disrespected women and was out here pimpin'
But he's nothing like that, but his girlfriend won't listen
In his mind everything is just going so perfect
He gave it all up for her, he feels like she is worth it
But now everybody's in her ear with this and that
They only bring her rumors they never once brought her back a fact
Matter of fact, the same girl in her head
Is texting him right now trying to get inside his bed
Instead of trusting her man she does what women do
And that's flipped out on him sad she don't got a clue
So she breaks up with him, that's where the plot thickens
A lot of people say things but you don't have to listen

And I know they say
That we in our last days so we all need to pray
And I know they say
That sometimes we stray but love will make us stay
And I know they say

Nothing to our face but behind our backs they hate
And I know they say
All kind of things but who cares anyway

Now he devised a plan, he wants his baby back
But he ain't did nothing wrong, can we remember that
But he don't care he says, he's got to swallow his pride
Cause when she's not by his side he feels like he's
dying inside
So he just gets a wedding ring and flowers and goes to
her house
Soon as she opens the door she starts to cuss him out
Then she says what she says and slams the door in his
face
Then he goes to walk away buy he gets hit by a stray

And I know they say
That we in our last days so we all need to pray
And I know they say
That sometimes we stray but love will make us stay
And I know they say
Nothing to our face but behind our backs they hate
And I know they say
All kind of things but who cares anyway
