"Sister And Brother"

I come from the dark side
Brought up on the spring tide
Left home with a young girl's pride
I've laboured long on the lessons of love.
No head, no grieving
No hurt, no bleeding
No heart, no feeling
No faith. No healing
And if you need a lover
Please look no further
We need each other
Like sister and brother.
Tho' the night life was sleazy
Words came so easy
Songs came to free me
From the cold hard lessons of love
No head, no grieving
No hurt, no bleeding
No heart, no feeling
No faith. No healing
And if you need a lover
Please look no further
We need each other
Like sister and brother.
With my head full of dreaming
For no rhyme nor reason
I feel for no heeding
The warning in the lessons of love.
No head, no grieving
No hurt, no bleeding
No heart, no feeling
No faith. No healing
And if you need a lover
Please look no further
We need each other
Like sister and brother.
