And does your fear not grow
When you see that you're all mine
See that you're all mine
With a knife in your chest
With a knife in your chest

And only songs will know
That the lies all move her
And come over to me
And everybody's --armor--

And did you feel no good
When you see that you're all mine
See that you're all mine
With a knife in your chest
With a knife in your chest

And over several --?--
When the conversation is slow
And they take back your own time

And only songs will know
That the lies all move her
And come over to me
And everybody's --armor--

And does your fear not grow
When you see that you're all mine
See that you're all mine

With a knife in your chest
With a knife in your chest
