"The Greatest Sex"

Visit "[The Greatest Sex](#)" on MotoLyrics.com

From beyond this bed of mine I see
Ceiling fans with you on top of me
And the window blinds are filled with rays of sun
And all you secret fantasies thy will be done (done)
And inside of your walls there will dwell a Capricorn
(that will feast your body all night)
If we keep this up then a love child will be born
All because
Of the greatest

[chorus]
The greatest you
The greatest me
We have found the greatest chemistry
The greatest touch
The greatest kiss
What came to be is the greatest wish
The greatest show
The greatest song
The greatest words
The greatest all night long
Baby your love stays constantly on my mind
This is the best sex I've ever had

I know twelve ways to make your love come down
And the secret places on you will be found
Like a voyage when the storm begins to roar
There's no telling what this night could have in store (in store)
Cause inside of your walls there will dwell a capricorn
(that will feast your body all night)
And if we keep this up then a love child will be born
All because
Of the greatest

[chorus]
The greatest you
The greatest me
We have found the greatest chemistry
The greatest touch
The greatest kiss

What came to be is the greatest wish
The greatest show
The greatest song
The greatest words
The greatest all night long
Baby your love stays constantly on my mind
This is the best sex I've ever had
[repeat 3x]

Something that happened out the day for the sake of
our love
Like a hand and glove we go together this love is
forever oooh This sex is so good I've got to break it
down
